OVER 30 WAYS TO FLY
 NO FAA REGISTRATION REQUIRED

parkzone, Eflite, HORIZON, hobbyzone, BLADE

Fly with your friends!

MASC
 MODEL AVIATION STUDENT CLUB

Student Organization for Aeronautic and Robotic Research (SOARR)

SOARR utilizes fully flight-capable model aircraft and rocketry under the direction of AMA qualified instructors as a motivational way to promote aeronautics, robotics, and the sciences that contribute to successful flight and experimental design concepts. SOARR is currently developing a remote site that will be used as a Martian landscape for testing interplanetary robotic designs in support of NASA's Stennis Space Center, as well as a remote command and control center to operate the vehicles.

AMA's video webcast: *AMA Air*

This month on *AMA Air*, we take a trip around the world with current top news stories! You'll get to hear about the inaugural World Drone Prix in Dubai and the unlikely champion who took home a \$250,000 prize. In addition, a *world first* for a quadcopter was attempted by a team in the UK. Their mission? Fly across the English Channel. Tune in to find out how the group fared. You'll also get a look at a new improvements to the International Aeromodeling Center in Muncie, IN, and how you can incorporate the same technology into your club field!

Find this episode and all of our past episodes on demand at air.modelaircraft.org.
