## Build and design a Boeing 777x

Together this family designed, built, tested, and successfully flew a Boeing 777x model using materials available at a craft store! This video documents their journey from basic calculations on paper, a minor setback (cat), and finally, flight!

## DJI Developer Challenge

The 2016 DJI SDK Developer Challenge is an opportunity for talented people to collaborate with industry leaders to create a search-and-rescue system for the future, and win \$100,000! Using DJI aerial systems and developer products such as the Guidance and Manifold with Ford vehicles, you must design an unmanned rescue aircraft that meets the tough requirements of search missions. The systems must be able to quickly take off from and land on a moving vehicle after surveying the area, and recognize objects and create a map of the scene.
